Instructions

^ COLLAPSE ^

1. Visit w3schools and go to the Java Tutorial section: https://my-learning.w3schools.com/tutorial/java
2. Complete the following readings
   1. Classes Lessons 11.7 - 11.14, 11.16 - 11.20, 11.22 - 11.26
   2. Java Quiz (on the tutorial page)

Guide:

1. Make sure you're in the main branch locally (`git checkout main`) and git pull origin main any pending changes
2. Make a new branch per the recommended branch name below (`git checkout -b ...`)
3. Fill in the items in the worksheet below (save as often as necessary)
4. Once finished, export the worksheet
5. Add the output file to any location of your choice in your repository folder (i.e., a Module4 folder)
6. Check that git sees it via `git status`
7. If everything is good, continue to submit
8. Track the file(s) via `git add (name_of_file)`
9. Commit the changes via `git commit -m "some summary message"` (don't forget the commit message)
10. Push the changes to GitHub via `git push origin (the_branch_name)` (don't forget to refer to the proper branch)
11. Create a pull request from the homework related branch to main (i.e., main <- "homework branch")
12. Open and complete the merge of the pull request (it should turn purple)
13. Locally checkout main and pull the latest changes (to prepare for future work)

13. Locally checkout main and pull the latest changes (to prepare for future work)
14. Take the same output file and upload it to Canvas

Task #1: Read the following sections
Sub Task #1: Classes Lessons 11.7 - 11.14, 11.16 - 11.20, 11.22 - 11.26

🖼 Task Screenshots

Gallery Style: 2 Columns

4   2   1

Because the window of all of classes lessons is so big I just
have a SS of the java course 100% done.

100%	Task #1: Reflect on the topics and refer to the checklist of this task

≡, Task Response Prompt

Mention specific concepts/topics

Response:

in the quiz the pre increment was new to me (i = num++ + ++num), alot of it was stuff ive already been through like polymorphism, superclasses, inheretence, etc.

Sub-Task

100%

Group: Reflection
Task #1: Reflect on the topics and refer to the checklist of this task
Sub Task #2: What concepts/topics were you already familiar with?

≡, Task Response Prompt

Mention specific concepts/topics

Response:

linked lists, hash maps, array list and other data types are very new to me, other specifc topics as well. Most of what I dont know are things ive herd about and understand them in a generalized way. I simply need more hands on uses for these topics and as I have problems that I incorperate these topics with Ill be more confident with them.

Sub-Task

100%

Group: Reflection
Task #1: Reflect on the topics and refer to the checklist of this task
Sub Task #3: What topics do you still not feel confident about? If confident, explain why.

≡, Task Response Prompt

At least a few reasonable sentences

Response:

Topics like polymorphism and inheritence get confusing to me since you need to consider if its an abstract class or if its an interface, each one of the classes have their own set of rules that alters the way you use them in the child classes, such as you end up either implementing or extending them from. You also need to consider their methods and if you are going to create a constructor or if you even can have a constructor given the type of class being created.
